Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Laufer (US 5,957,919). Laufer discloses a method of reducing lung size of a lung, including the steps of inserting a conduit down a trachea, into a mainstem bronchus, into a bronchial branch, and into a bronchial sub-branch communicating with a lung portion of the lung to be reduced in size (Column 5, Lines 20-27), pulling a vacuum in the lung portion to collapse the lung portion (Column 6, Lines 26-37), and deploying an obstructing member/plug including feeding the obstructing member/plug down the conduit and into the bronchial sub-branch (Column 4, Lines 52-65).

Response to Arguments

Applicant's arguments, see Paper No. 5, filed August 4, 2003, with respect to the rejection(s) of claim(s) 1-5 under Medhkour et al and Medhkour et al in view

Art Unit: 3763

of Dayal have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Laufer.
